Applied Remote Sensing Training (ARSET)
Webinar on

Introduction to NASA Earth Science Data Products, Portals, and Tools

September 16 – October 14, 2013   8-9 AM U.S. Eastern Standard Time (13 PM UTC)

Tuesdays (5 webinars: one hour per week*)

Webinar Registration will be Available in August 2014 at:

http://arset.gsfc.nasa.gov/

Course Objective:
To provide a broad overview of environmental parameters available from NASA Earth Science to facilitate environmental decision support by monitoring and mapping air quality, water resources and disasters, and ecosystems

Course Participation:
This course is free and is intended for international development agencies, public private sector organizations working in environmental management, applications and decision making. *Space is limited, preference will be given to environmental professionals*

For More Information Contact:
Brock Blevins: bblevins37@gmail.com or
Amita Mehta: amita.v.mehta@nasa.gov

Course Agenda

Week 1: **NASA Earth Science:** *Research and Applications to Decision Support*

Week 2: **Overview of NASA Earth Science Data Products:** Remote Sensing and Earth System Modeling Data

Week 3: **NASA Data Centers**

Week 4: **NASA Data and GIS Applications:** Air Quality, Water Resources

Week 5: **NASA Data and GIS Applications:** Disaster, Agriculture and Ecology
