

NASA Applied Remote Sensing Training (ARSET) Program Overview

Pawan Gupta, Melanie Follette-Cook, and Bryan Duncan

NASA Remote Sensing for Air Quality Applications, March 20-23, 2018, Jakarta, Indonesia

NASA's Applied Remote Sensing Training Program (ARSET)

<http://arset.gsfc.nasa.gov/>

- Empowering the global community through remote sensing training
- Part of NASA's Applied Sciences Capacity Building Program
- Goal: increase the use of Earth Science in decision-making through training for:
 - policy makers
 - environmental managers
 - other professionals in the public and private sector
- Trainings offered focusing on applications in:

Disasters
9 Trainings

Eco
12 Trainings

Health & Air Quality
52 Trainings

Water Resources
20 Trainings

ARSET Training Levels

Advanced Training, Level 2

- Online and in-person
- Requires Level 1 training or equivalent knowledge
- More in-depth or focused topics

Beginning Training, Level 1

- Online and in-person
- Requires Level 0 training or equivalent knowledge
- Specific applications

Fundamentals Training, Level 0

- Online only
- Assumes no prior knowledge of remote sensing

ARSET Training Levels

Advanced Training, Level 2

- Advanced Webinar: Using NASA Remote Sensing for Flood Monitoring and Management

Beginning Training, Level 1

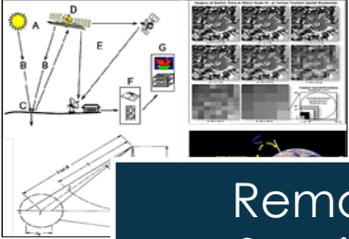

- NASA Remote Sensing Observations for Flood Management

Fundamentals Training, Level 0

- Fundamentals of Remote Sensing
- Satellites, Sensors, and Earth Systems Models for Water Resource Management

ARSET Air Quality Trainings

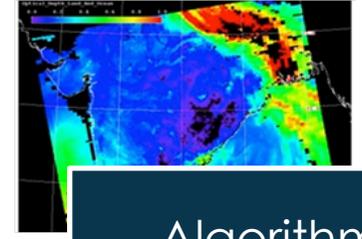

Remote Sensing

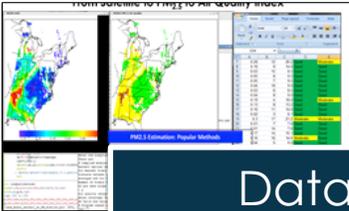

Satellites

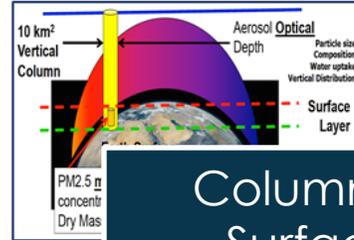

Imagery

Algorithms

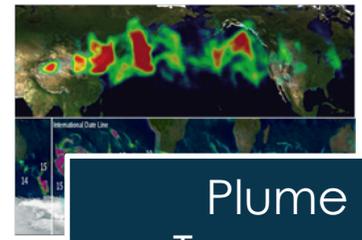

Data & Tools

Column to Surface

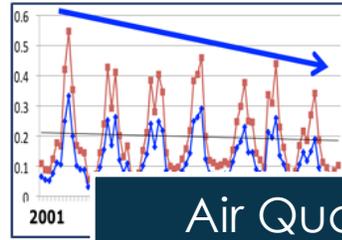

Dust & Smoke

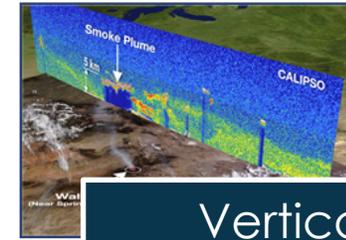

Plume Transport

Satellite & Model Comparison

Air Quality Trends

Vertical Profiles

Learn More About ARSET

<http://arset.gsfc.nasa.gov/>

The screenshot shows the ARSET website interface. At the top, there is a header with the NASA logo, the text "ARSET Applied Remote Sensing Training", and navigation links for "Earth Sciences Division", "Applied Sciences", and "ASP Water Resources". A search bar is located on the right side of the header. Below the header is a navigation menu with "Home", "About", and "Trainings" (which is expanded to show "Fundamentals", "Disasters", "Health & Air Quality", "Land", and "Water Resources"). The main content area features a large image of a satellite view of a coastal area with a greenish tint, overlaid with a dark box containing the text "Introduction to Remote Sensing of Harmful Algal Blooms" and "Tuesdays, Sep 5-26, 2017 11:00-12:00 or 21:00-22:00 EDT (UTC-4)". A "Register Now" button is positioned below the text. To the right of the main content is a sidebar with the heading "ARSET" and a list of links: "Online Trainings", "In-Person Trainings", "Sign up for the Listserv" (highlighted with a red arrow), "Tools Covered", "Suggest a Training", "Personnel", and "Resources". Below the sidebar is a section titled "Upcoming Training" with the heading "Water" and the text "Satellite Observations of Water Quality for".

Training Outline

- **Day 1**

- Introduction
- Remote Sensing
- Image Access & Interpretation
- Data Formats
- Aerosol Observations
- Aerosol Data

- **Day 4**

- Case study Analysis and Presentations

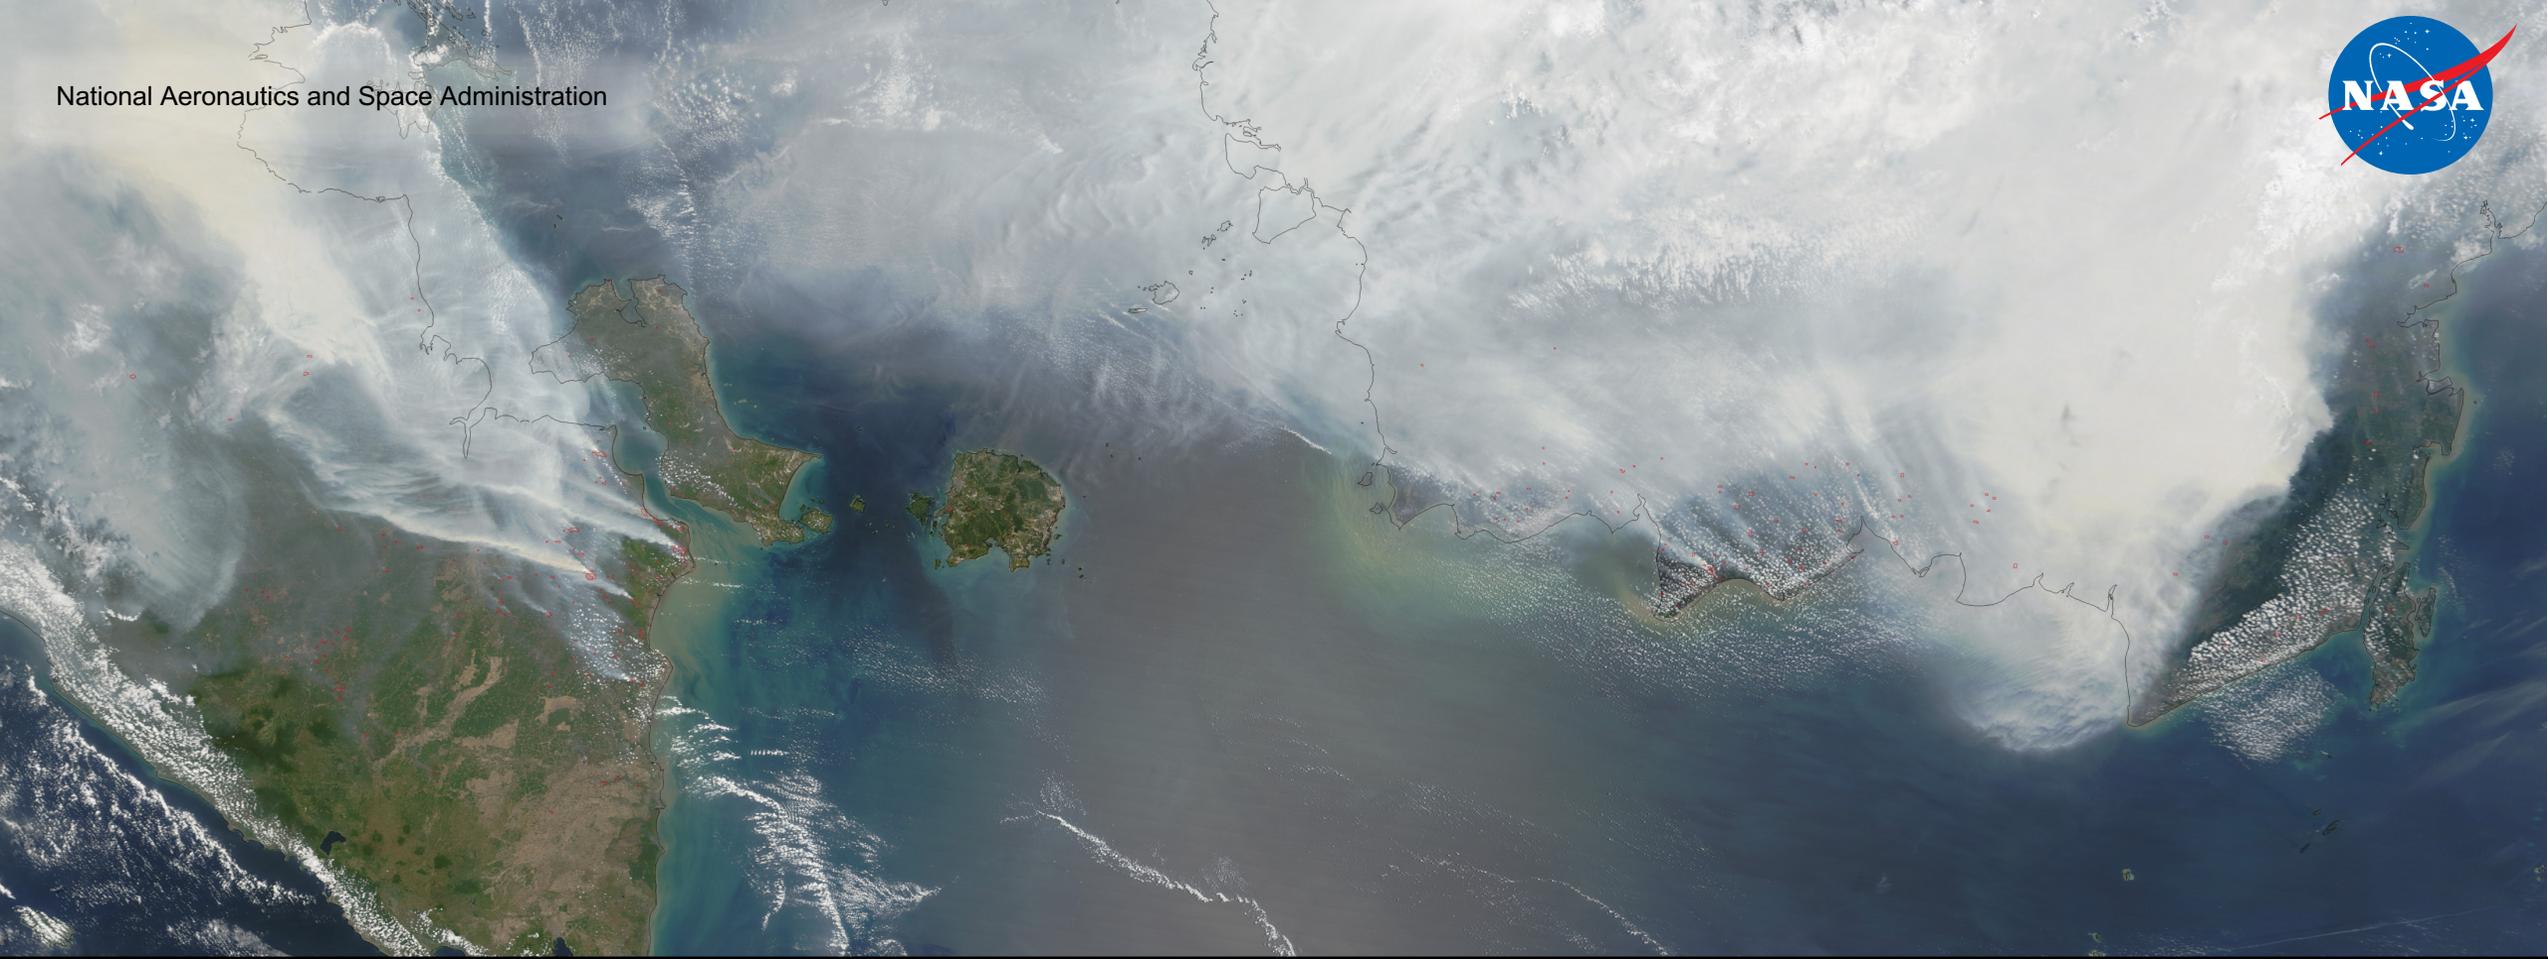

- **Day 2**

- Aerosol Products
- Aerosol Data Validation
- Reading and Mapping Aerosol data
- PM_{2.5} Estimations
- PM_{2.5} Data Sets
- PM_{2.5} Applications

- **Day 3**

- Fire Detection
- Trace Gas Remote Sensing
- NO₂ & SO₂ Data Access and Analysis
- Aerosol vertical profile
- Volcanic Eruptions
- Reanalysis Data Sets
- Geostationary Observations
- Future Missions

Overview of Satellite Capabilities for Air Quality Monitoring

Satellite Remote Sensing of Air Quality, March 20-23, 2018, Jakarta, Indonesia

Pawan Gupta, and Melanie F. Cook

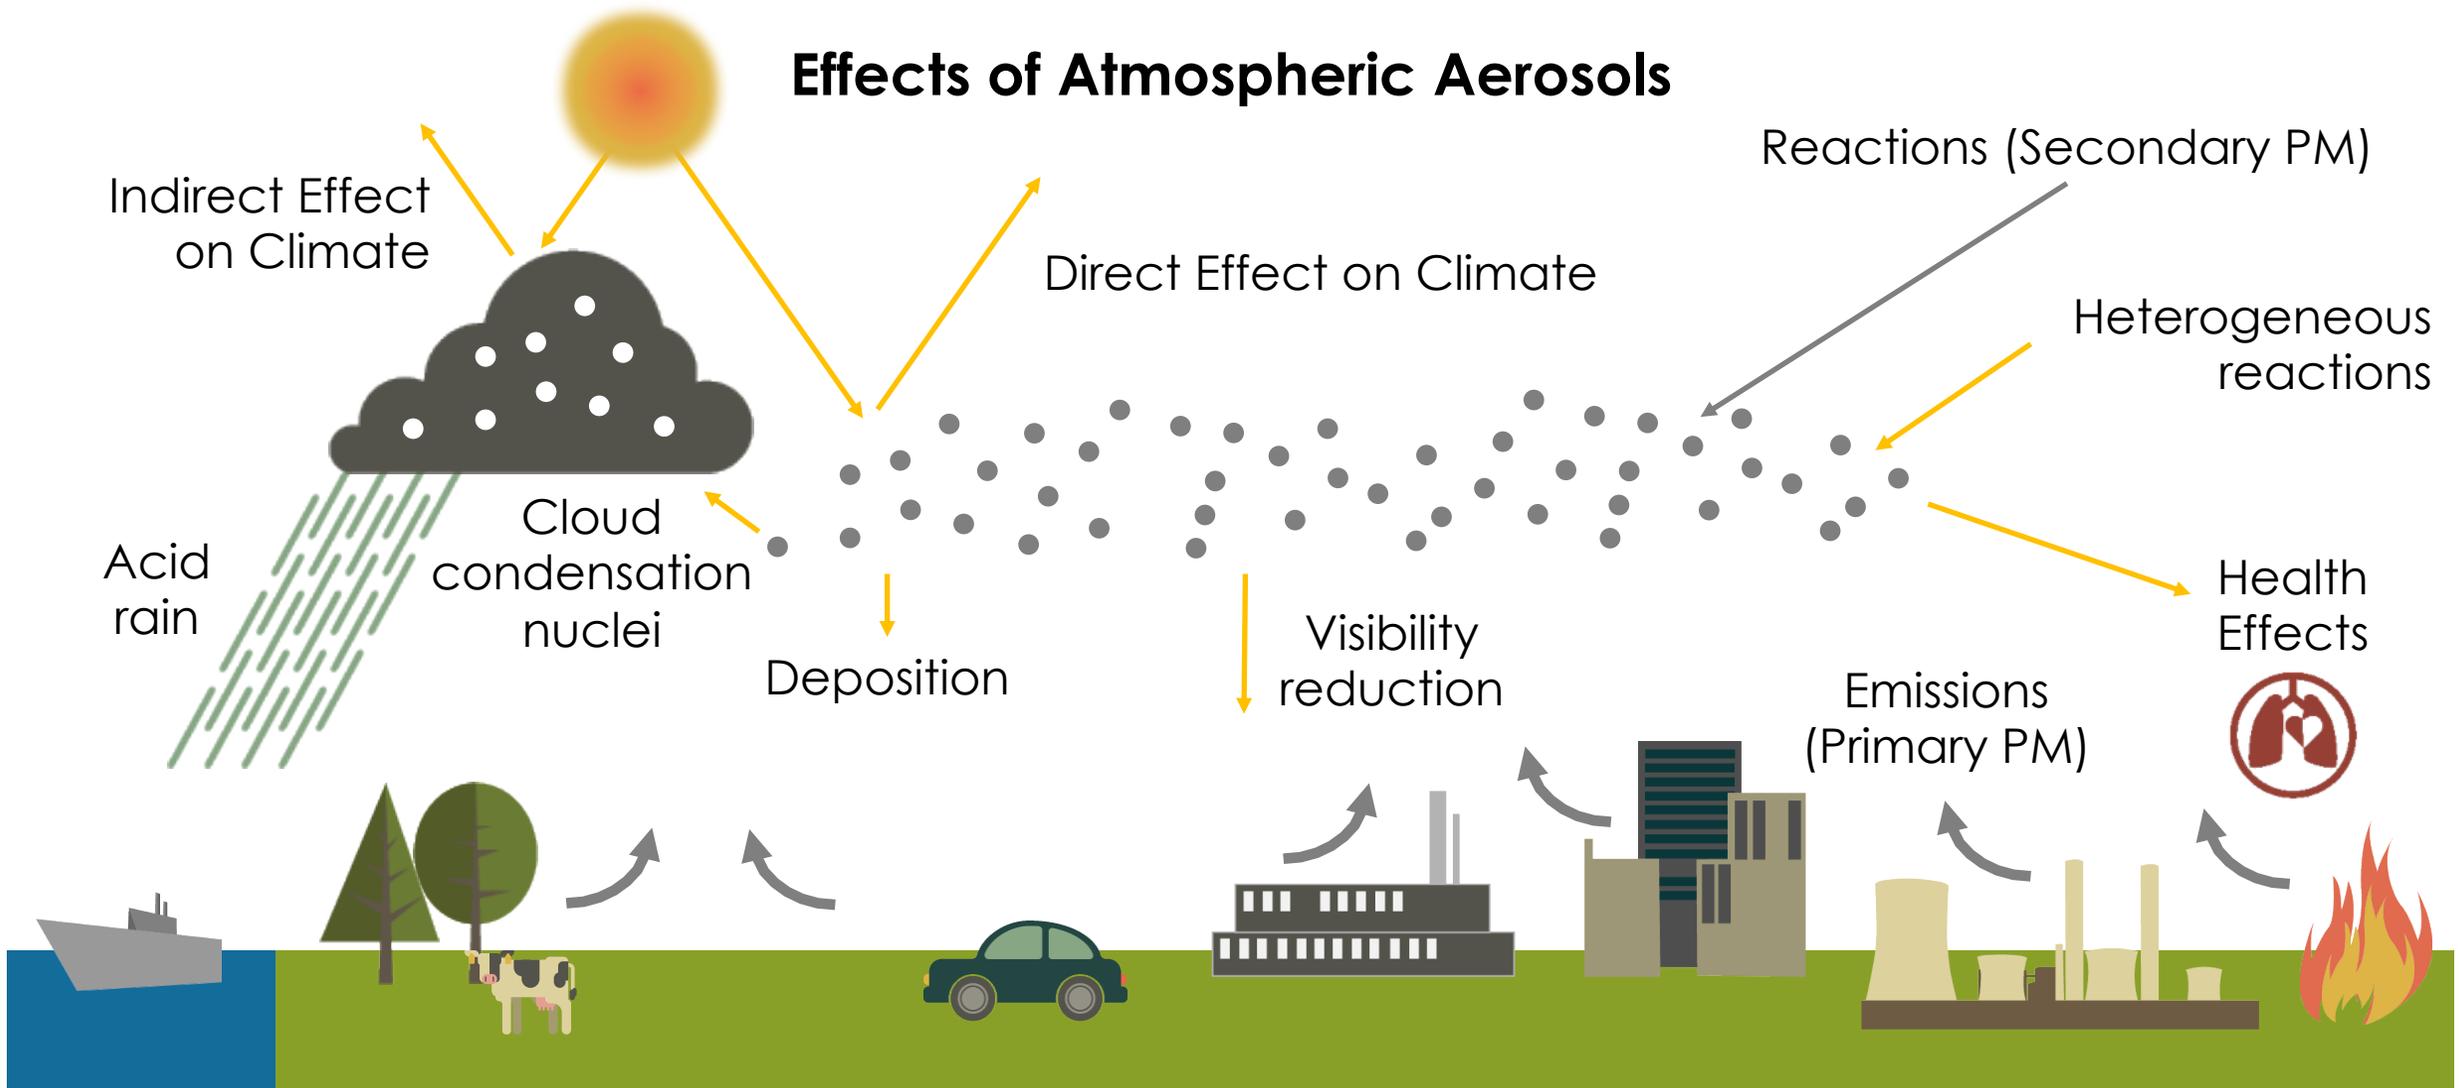

Learning Objectives

By the end of this presentation, you will be able to:

- Describe existing satellite capabilities for global air quality monitoring
- Identify various air quality monitoring applications

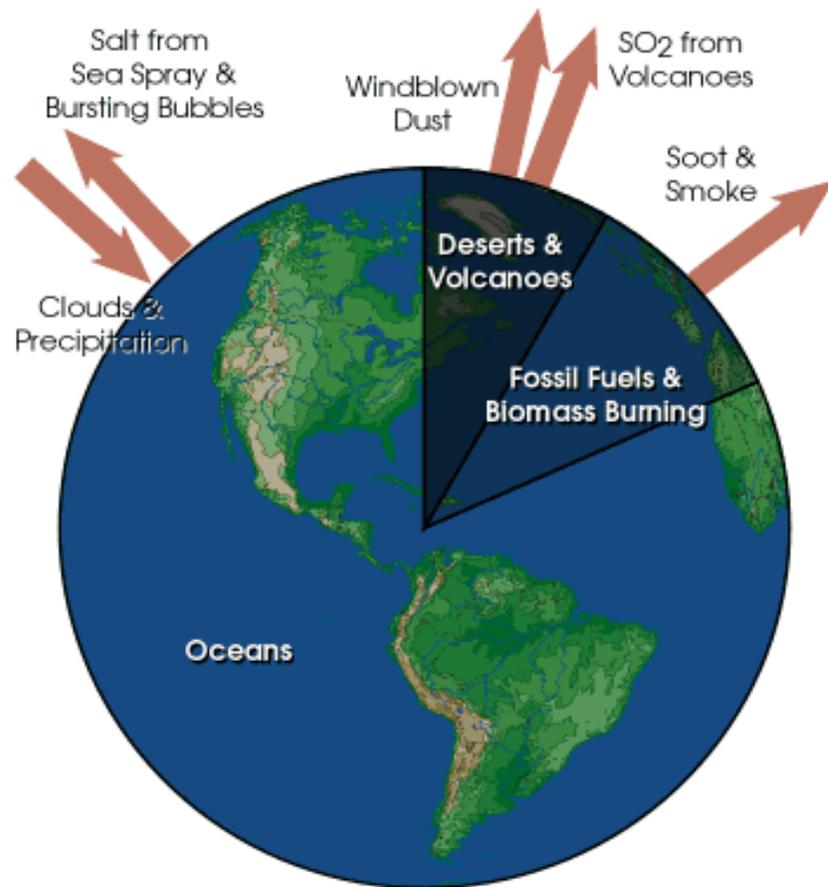

Motivation: Tiny, but Potent

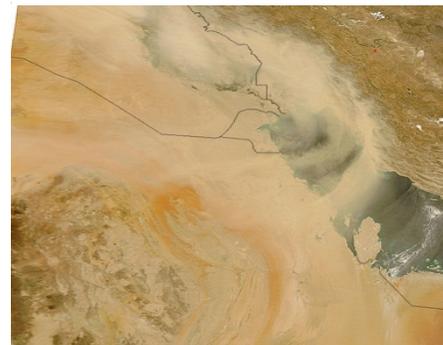

Pollution Sources

Atmospheric aerosols are highly variable in space and time

Dust

Fossil Fuels & Biomass Burning

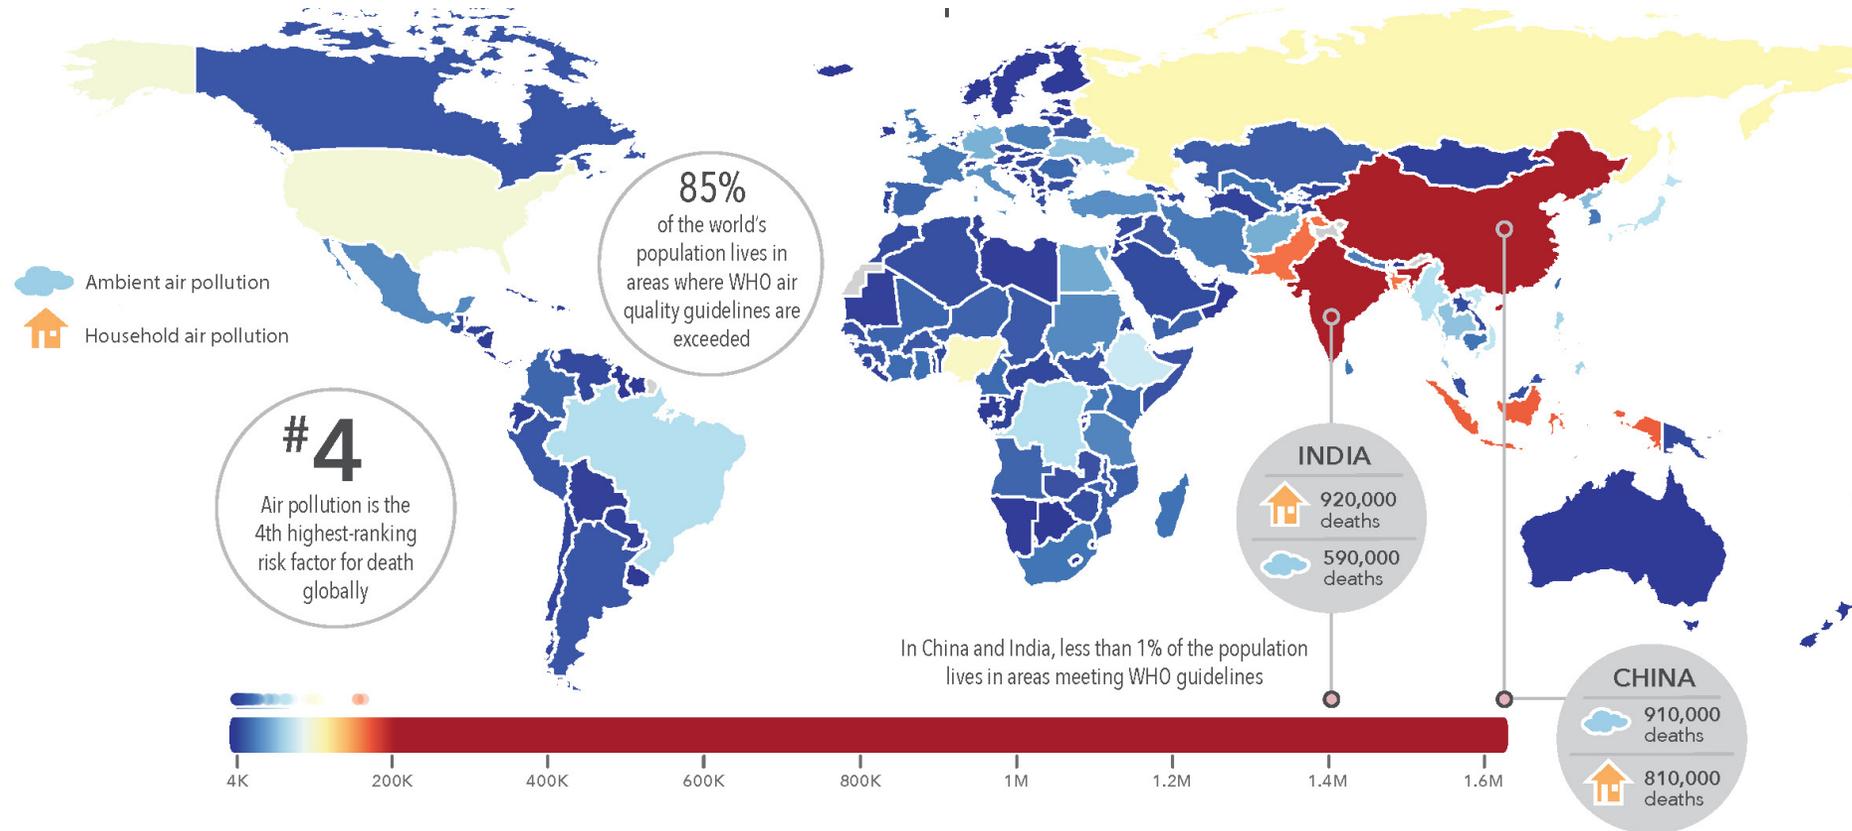

Volcanoes

Soot & Smoke

Global Burden of Air Pollution

- Air pollution was responsible for 5.5 million deaths in 2013
- Satellite data can help quantify the impact on human health

Image Credit: <http://thelancet.com/gbd/2013>

UN Sustainable Development Goals (SDGs)

Transforming Our World: The 2030 Agenda for Sustainable Development

SUSTAINABLE DEVELOPMENT GOALS

- A plan of action for people, planet, and prosperity
- All countries and all stakeholders, acting in collaborative partnership, will implement this plan
- 17 SDGs and 169 targets under this agenda
- Balance the three dimensions of sustainable development:
 - economic, social, and **environmental**

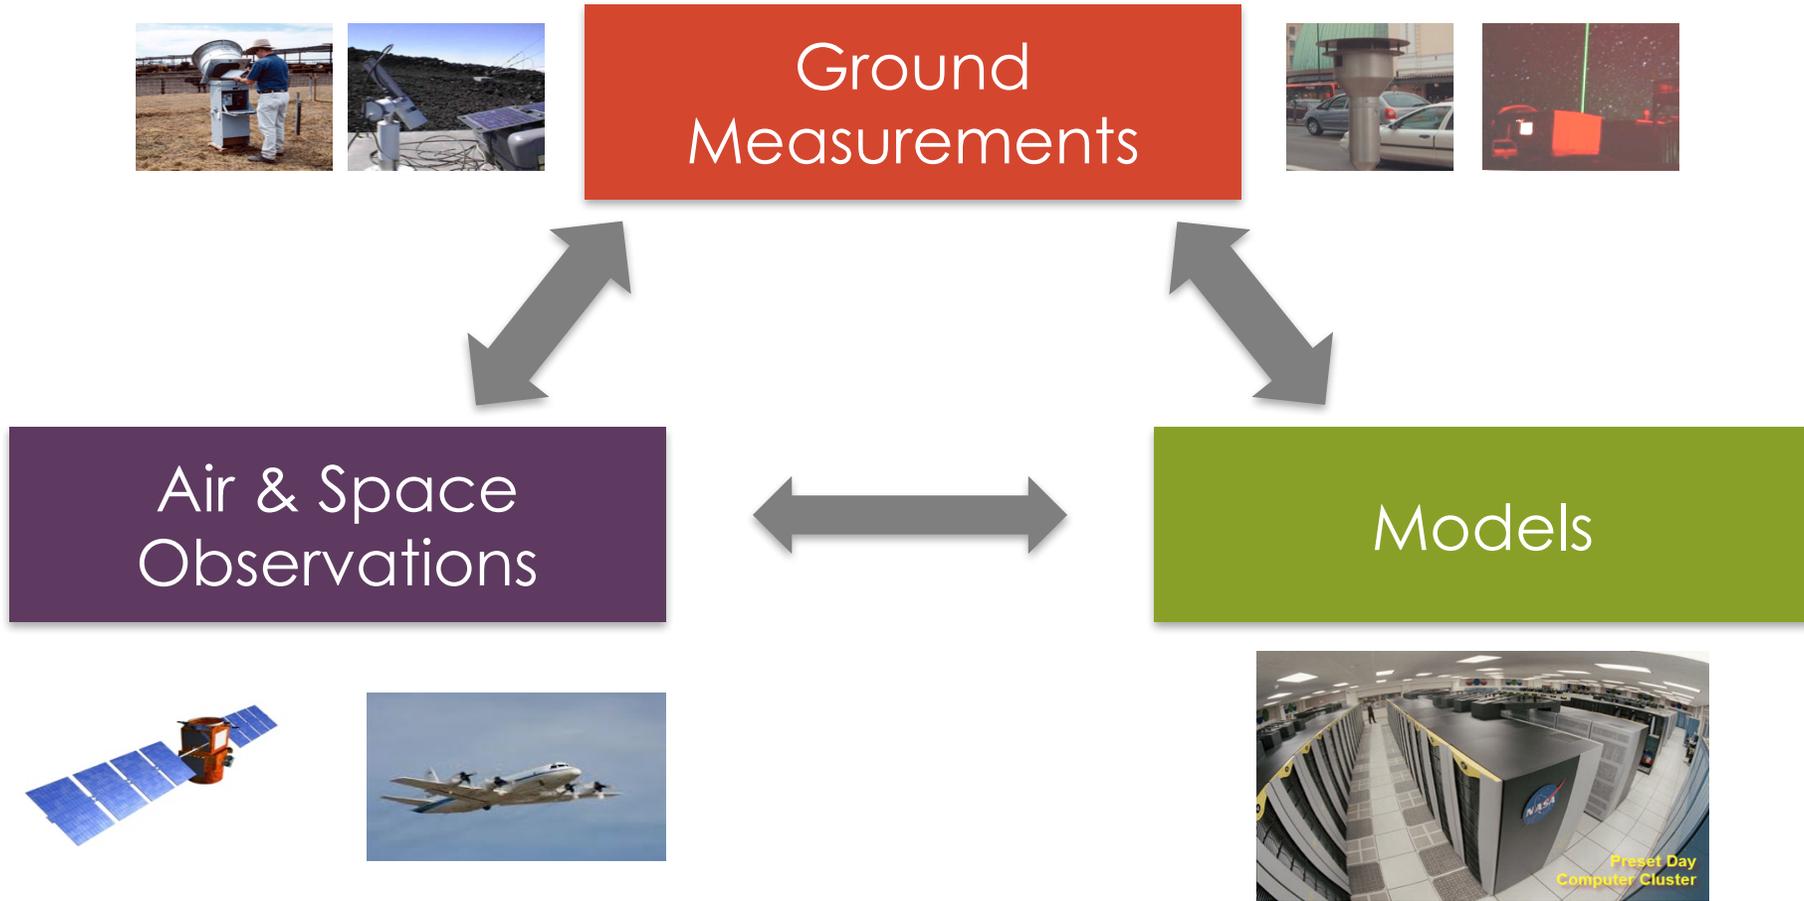

Text adapted from "[Transforming our world: the 2030 Agenda for Sustainable Development](#)"

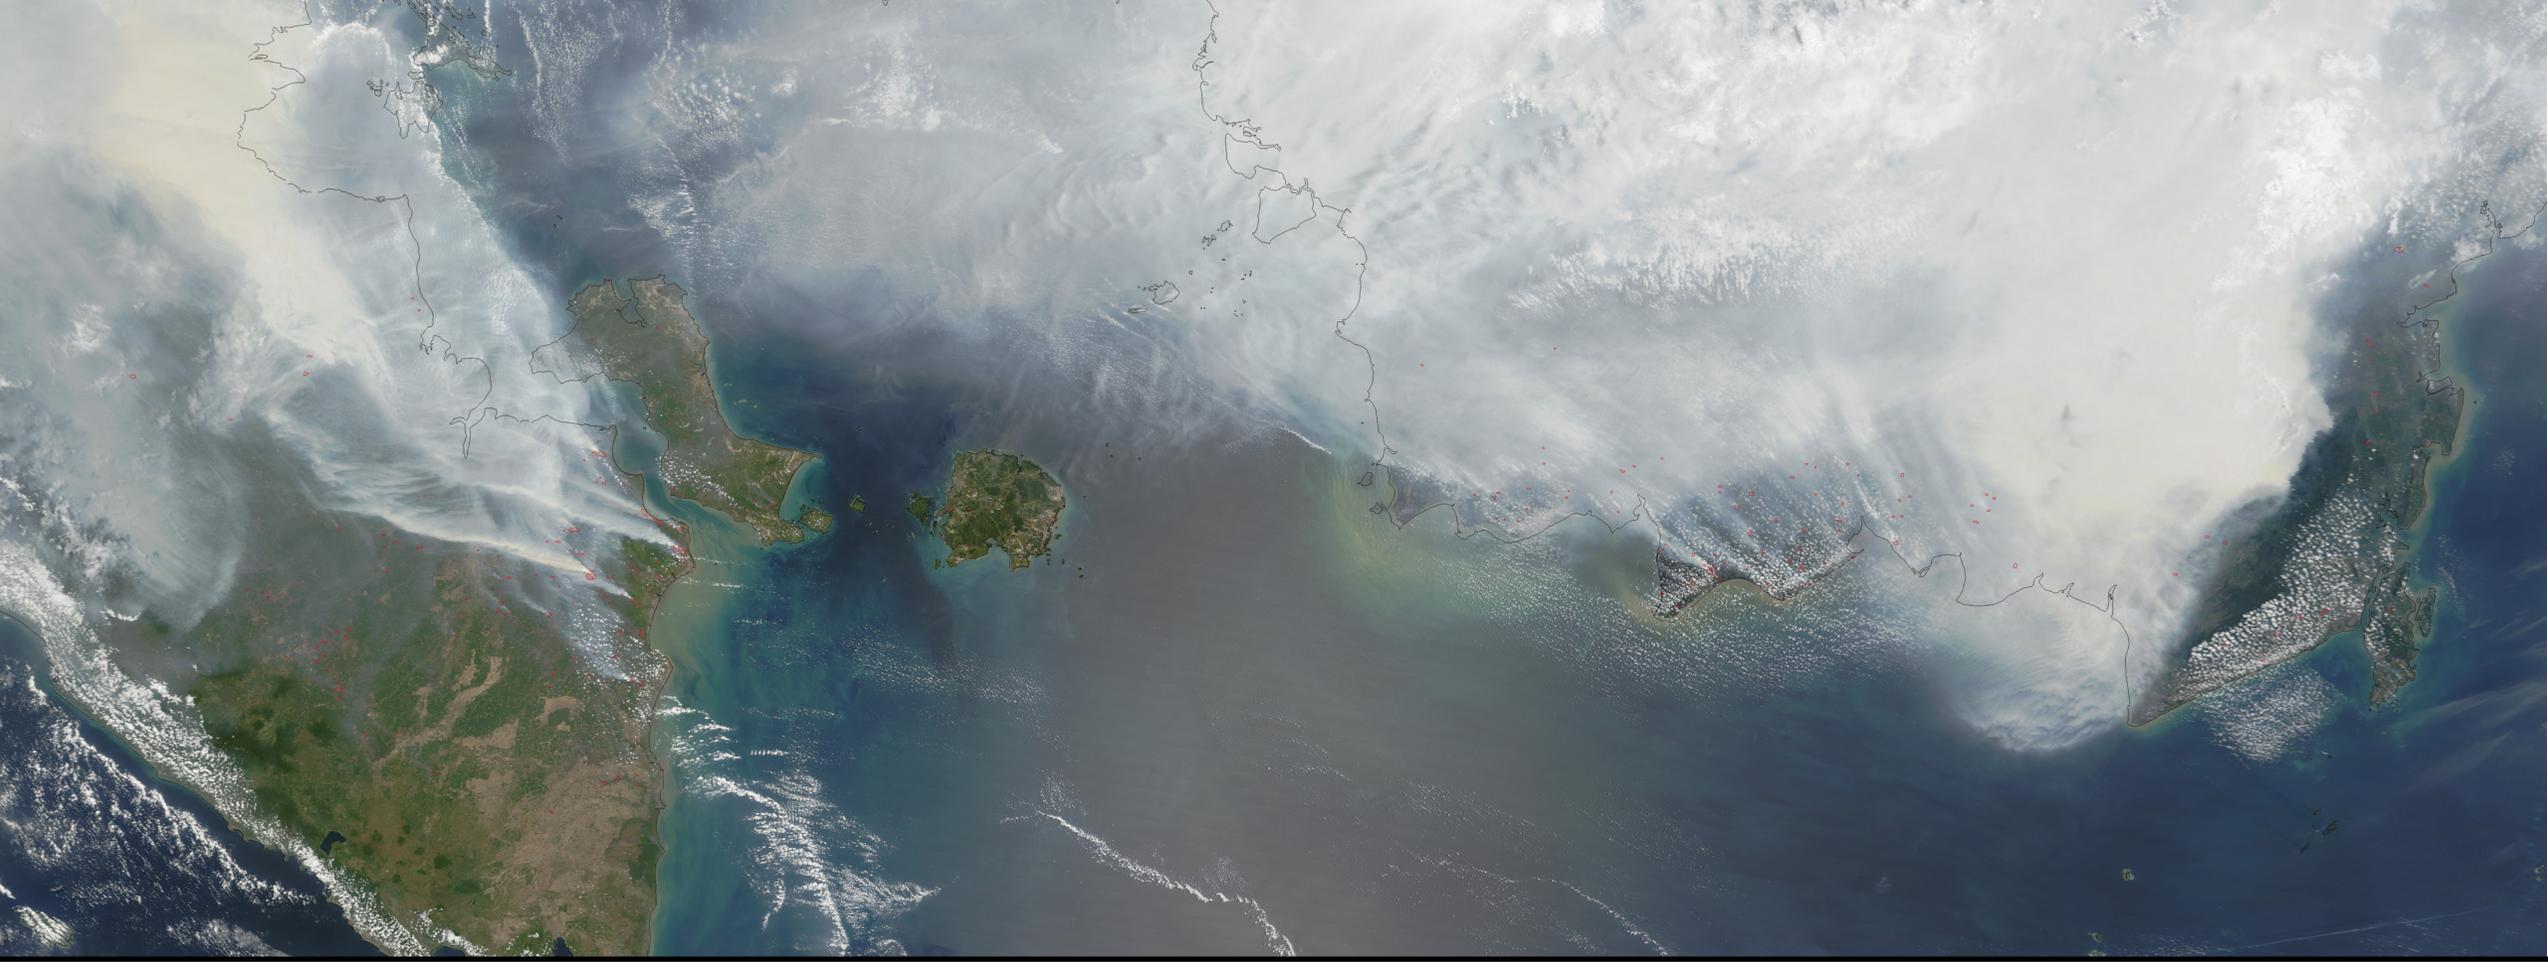

Traditional Air Quality Monitoring

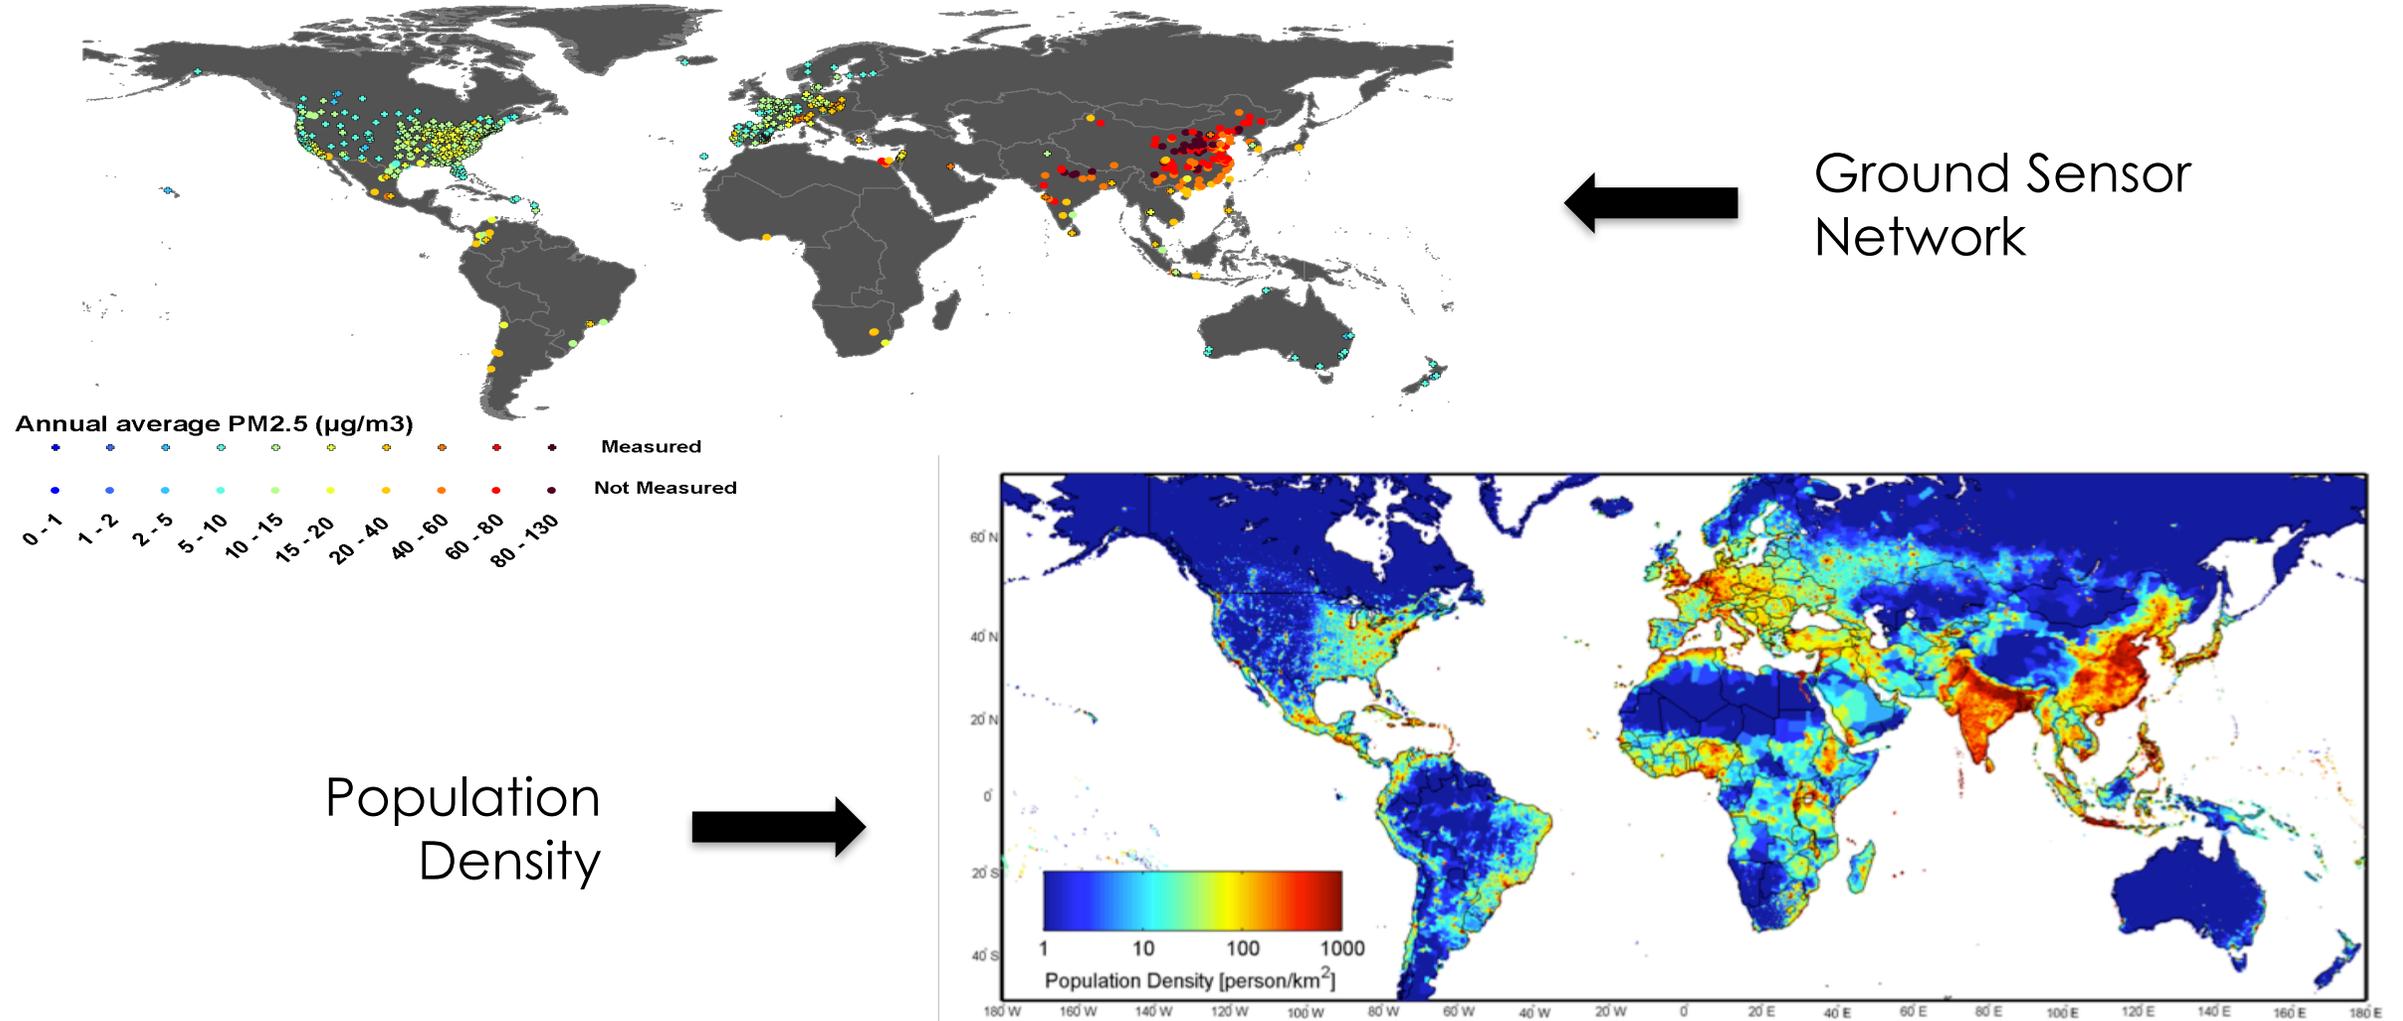

Air Pollution Monitoring

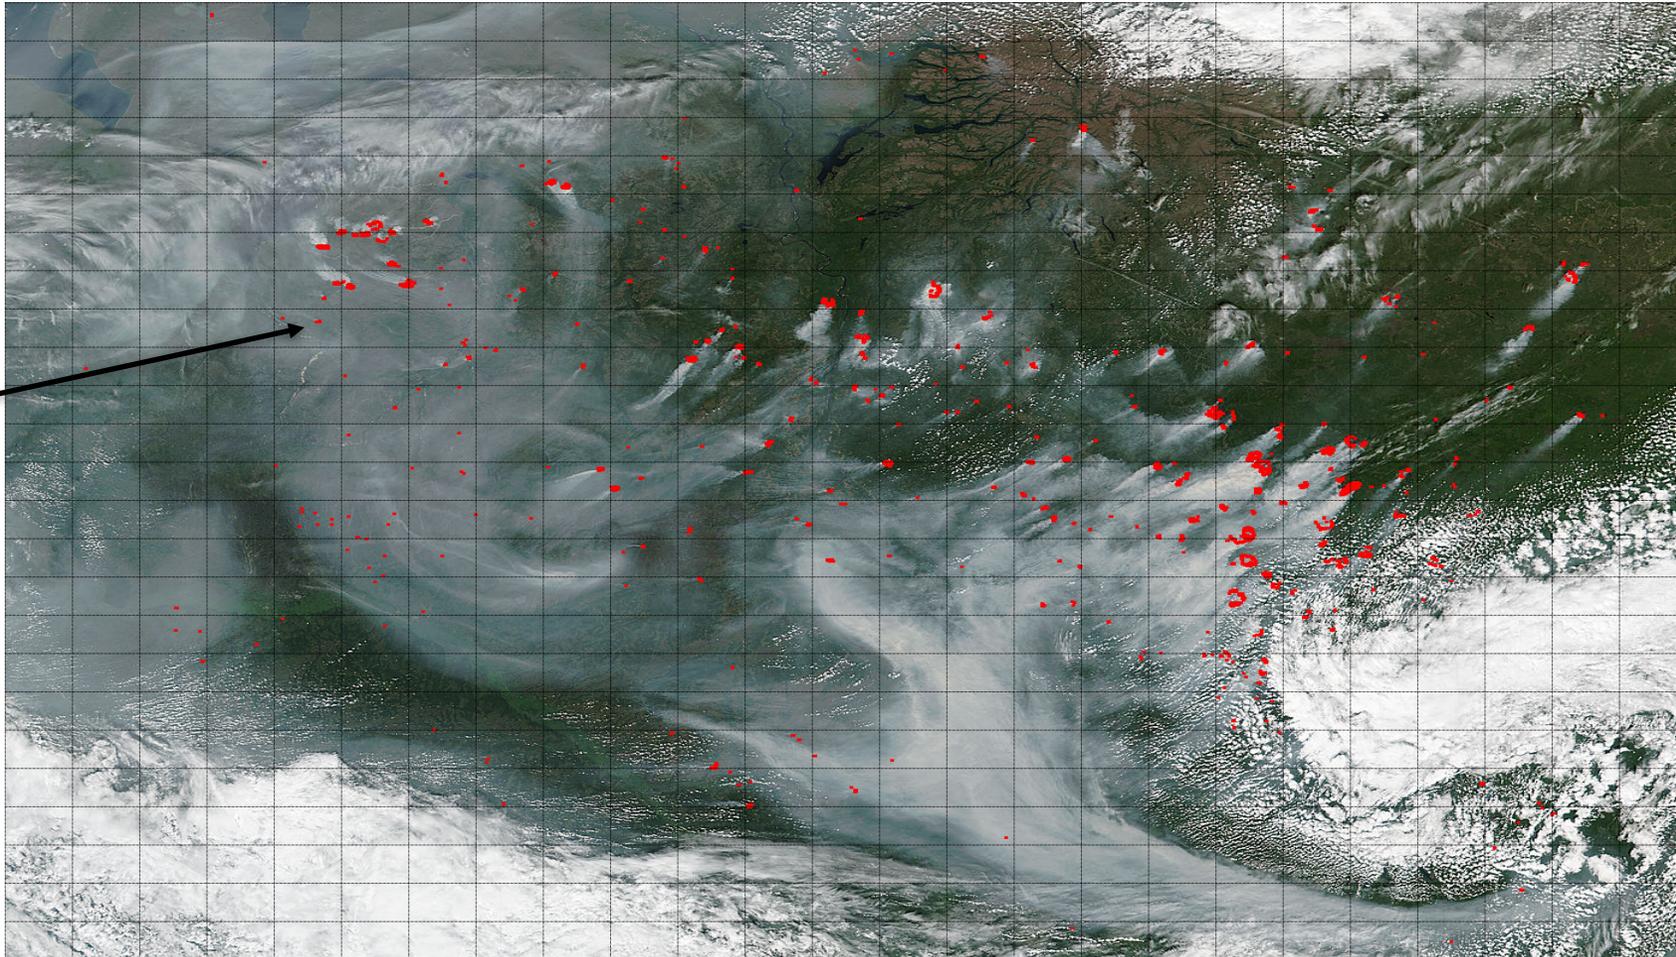

Why use satellite data?

Global Status of PM_{2.5} Monitoring

“A Picture is Worth a Thousand Words”

A satellite picture is worth ~~a~~ **millions of data points**

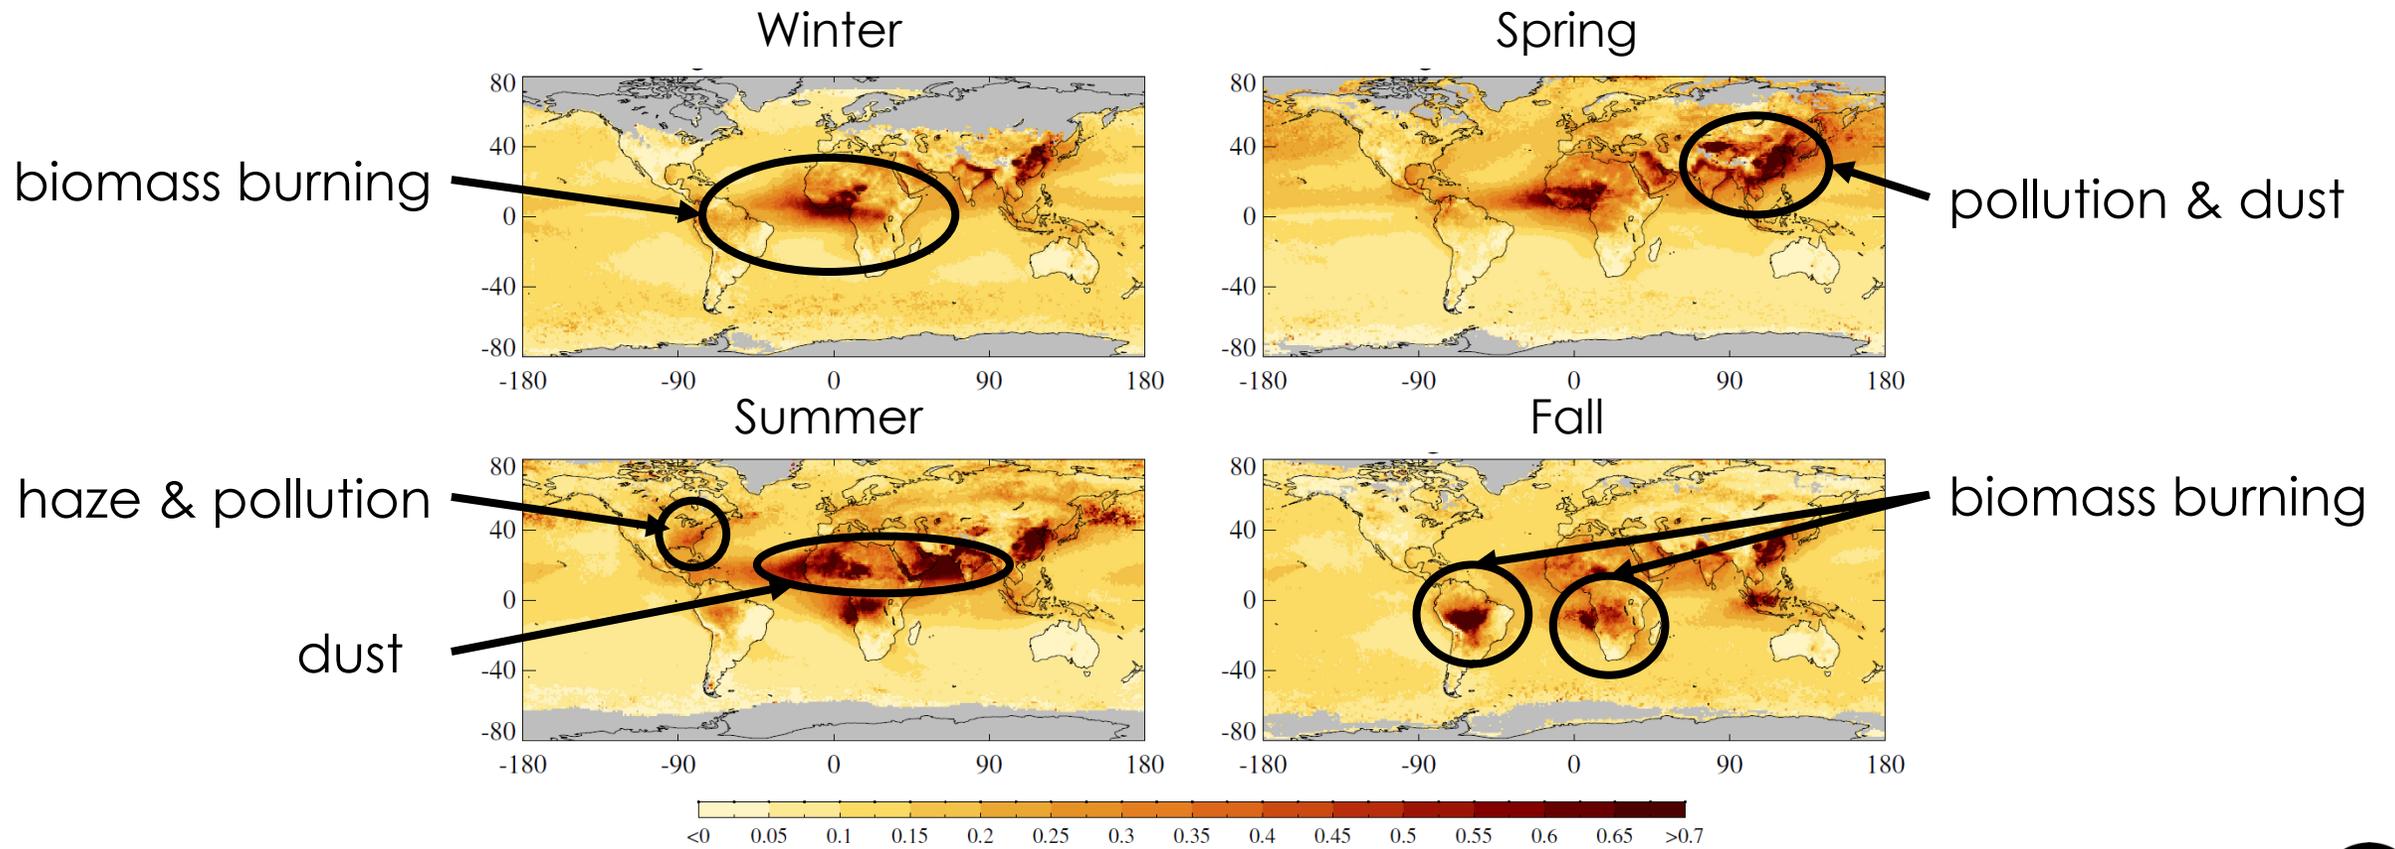

A geo-physical number

Aerosols from Satellites

- Several satellites provide state-of-the-art aerosol measurements globally, on a daily basis

Aerosol Optical Thickness (Aqua MODIS)

Nitrogen Dioxide (NO₂)

NASA Earth Science Current Operating Missions

InVEST/CubeSats
RAVAN
IceCube
MiRaTA

NASA Earth Science

Missions: Present Through 2023

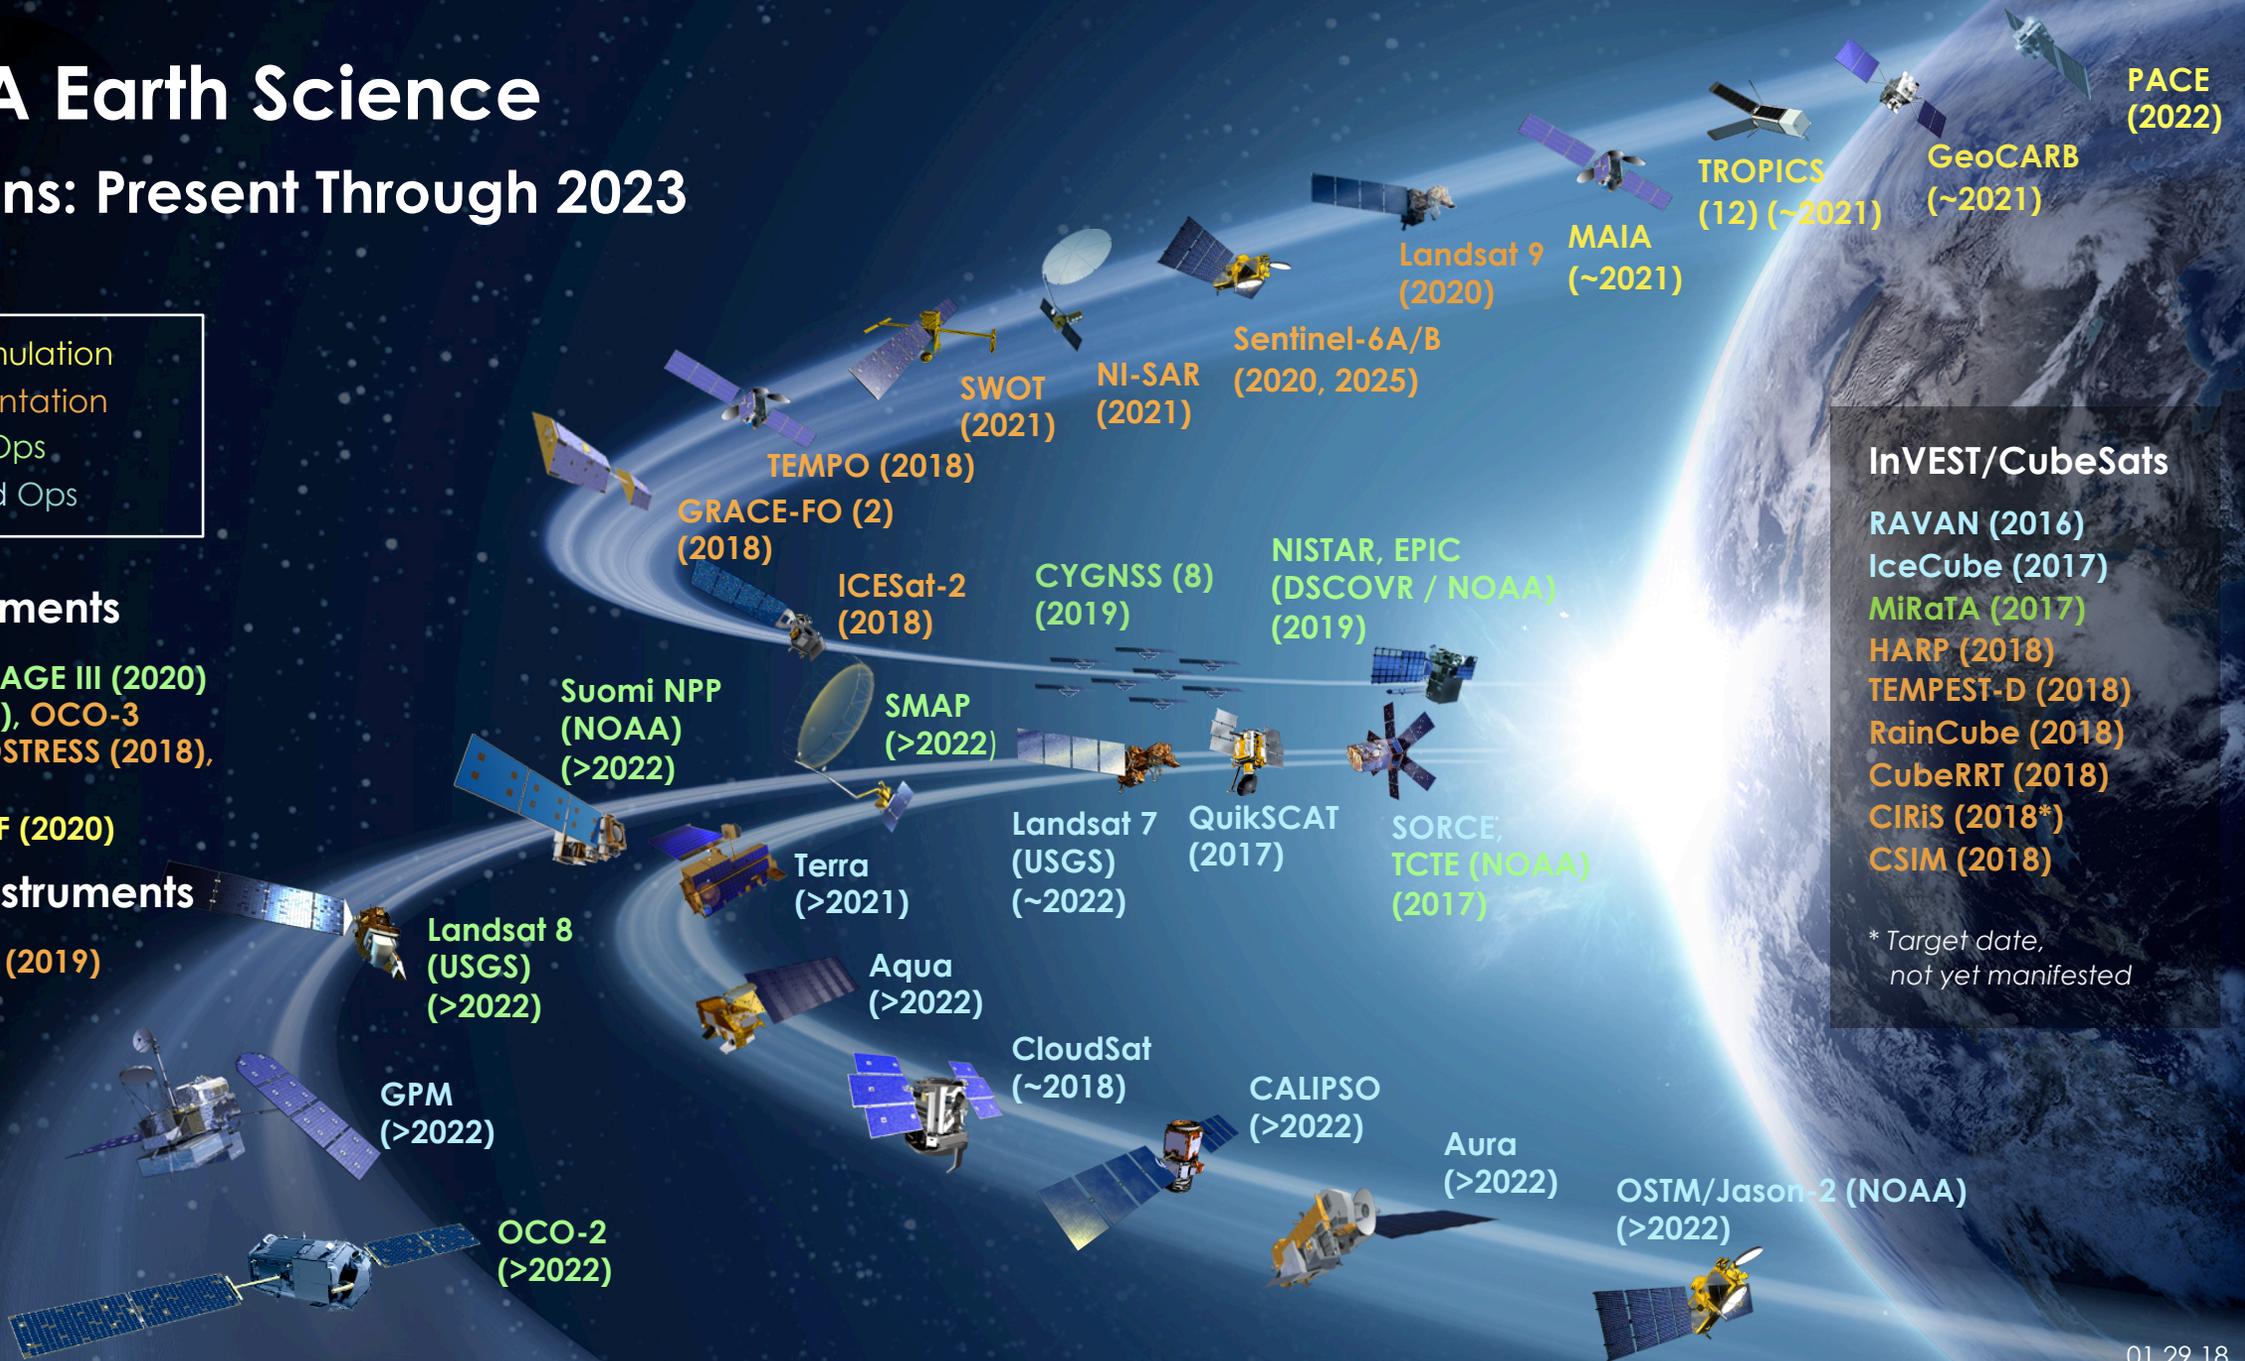

- (Pre)Formulation
- Implementation
- Primary Ops
- Extended Ops

ISS Instruments

LIS (2020), SAGE III (2020)
 TSIS-1 (2018), OCO-3 (2018), ECOSTRESS (2018),
 GEDI (2018)
 CLARREO-PF (2020)

JPSS-2 Instruments

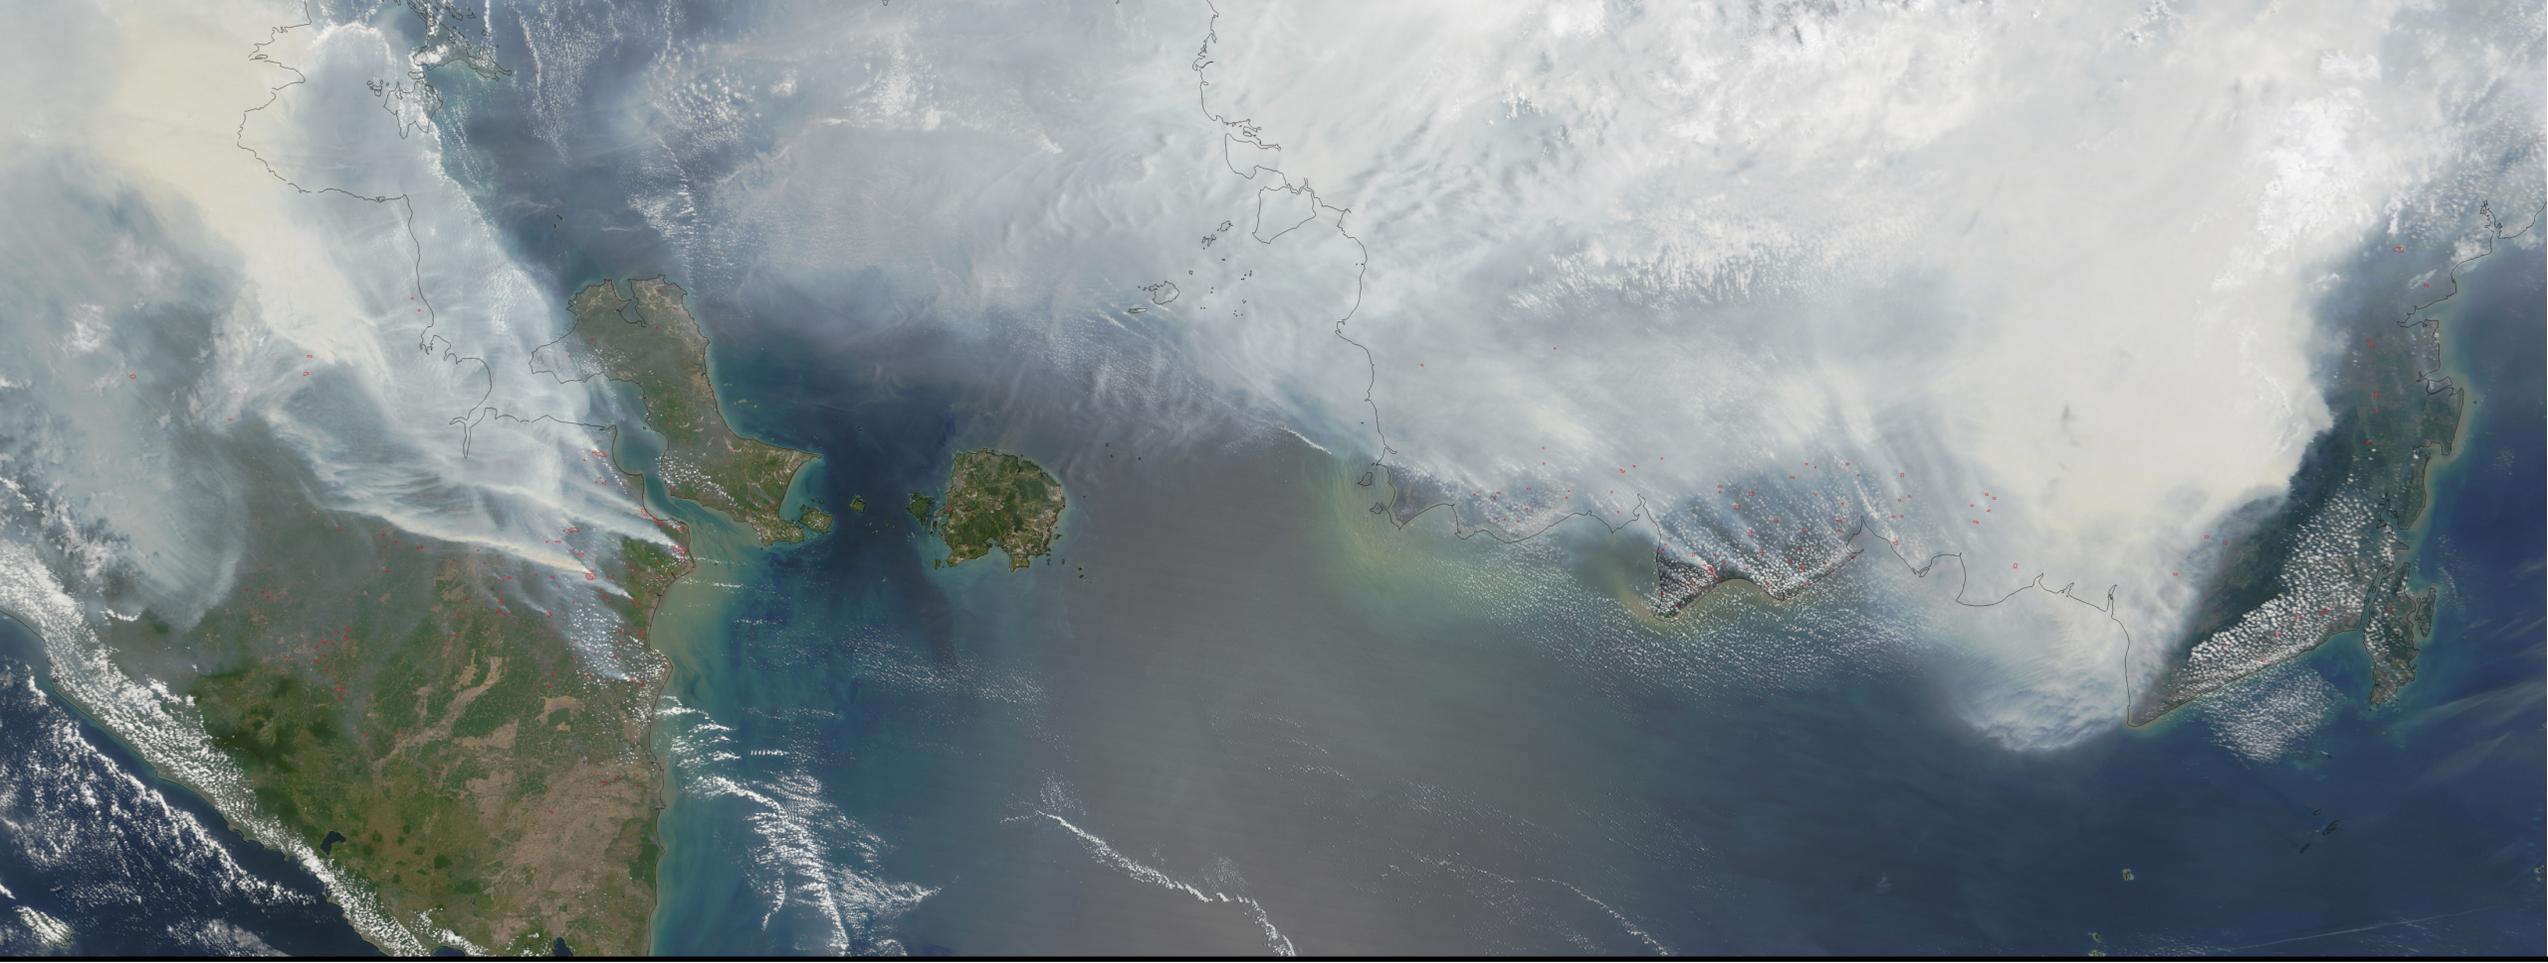

OMPS-Limb (2019)

InVEST/CubeSats

- RAVAN (2016)
- IceCube (2017)
- MiRaTA (2017)
- HARP (2018)
- TEMPEST-D (2018)
- RainCube (2018)
- CubeRRT (2018)
- CIRiS (2018*)
- CSIM (2018)

* Target date, not yet manifested
